C-MAP ENC

Type Approved Distribution Format for easy installation

The ENC solution for the Professional Mariner

C-MAP ENC is composed exclusively of official ENC's produced by national Hydrographic Offices. The product is authorized and complies with all official regulations and requirements related to the distribution and usage of official ENC's. An approved ECDIS combined with C-MAP ENC makes paperless navigation possible.

Using C-MAP ENC, supplemented with the C-MAP Professional+ chart database in areas that are not covered by ENC, will provide for the best digital chart coverage. This concept is known as "Dual-Fuel".

The Jeppesen SENC format

This product is distributed in Jeppesen's SENC format. SENC distribution makes the chart data available and secure in a format ready to be used on the ECDIS, and is supported by the majority of ECDIS brands on the market. The main benefit of the Jeppesen SENC format is that installation and updating can be carried out in a fraction of the time compared to other formats.

C-MAP ENC subscription service offers extended coverage and all available chart scales from Transit to Harbour and Berthing

The C-MAP Update Service

C-MAP ENC is continuously updated by including new ENC's, new editions of ENC's and Notices to Mariners issued by the national Hydrographic Offices.

Subscribers can choose from a range of options to keep their onboard databases updated based on their particular operational requirements and the communication facilities available on the vessel.

For more information on the C-MAP Update Service, please see the separate product sheet.

Licensing

The easy and flexible licensing system ensures that the portfolio can be tailored to meet individual end-user requirements, thus reducing costs. The subscriber can choose between two different licensing methods:

- The C-MAP Chart Catalog allows subscribers to plan and order electronic ENC's interactively. Orders can be electronically tailored to the subscriber's specific needs and the appropriate license codes ordered by e-mail. Access codes are then returned in the same way allowing access to the ENC's.
- The C-MAP Dynamic Licensing service is a user-friendly and cost-effective method for licensing ENC's. The service ensures immediate access to ENC licenses whenever they are needed, by panning and zooming on the screen or when navigating the vessel into a new ENC on the ECDIS.

For more information on the C-MAP Chart Catalog and C-MAP Dynamic Licensing, please see the separate product sheets.

FORMAT

The data is distributed in Jeppesen's SENC format.

The SENC technology developed for the distribution of ENC data has been type approved by DNV.

SUPPORTING APPLICATIONS

The Jeppesen SENC format is supported by the majority of ECDIS (Electronic Chart Display and Information Systems) manufacturers. For an overview of compatible systems, please see: www.jeppesen.com/marine.

DISTRIBUTION

The C-MAP ENC product is distributed on a single DVD.

COVERAGE

Jeppesen Norway is an authorised distributor of official ENC's (Electronic Navigational Charts) and can offer the largest portfolio of official ENC data.

LICENSING

Subscribers can choose the license period based on their service and routes. Depending on the relevant HO's policy, the options are 3, 6 or 12 months. Ordering is based on a chart-by-chart selection requiring payment only for the charts that are needed.

CHART CATALOG

To obtain an up-to-date overview of available ENC coverage, plan a portfolio, or prepare an order, please visit www.jeppesen.com/marine and download a free copy of the C-MAP Chart Catalog.
